ance Notes on Codes and Abbreviations" appearing at the begin-
ning of each regular issue of the PCT Gazette.

(54) Title: USE OF GNRH AGONISTS TO SUPPORT THE LUTEAL PHASE DURING INFERTILITY TREATMENT

(57) Abstract: The present invention concerns the use of an agonist of an hypothalamic hormone for the preparation of a phar-
maceutical agent to support the luteal phase during infertility treatment of female mammals and more specifically of women. According
to this invention, the pharmaceutical agent is suitable to be used for supporting the luteal phase after a spontaneous ovulation or after
stimulation of follicular growth, trigger of final follicular maturation and ovulation with one or several additional agents.
